Home Performance with ENERGY STAR® Program

Home Performance Audit Worksheet

General Terms and Conditions

- 1. Eligibility:** The Home Performance with ENERGY STAR® (HPwES) Program is valid for Maryland residential customers of Potomac Edison.
- 2. Auditors:** Auditors are not employees of Potomac Edison.
- 3. Document Retention:** Customers are advised to retain a copy of this form and any other documents provided to you by the auditor. Potomac Edison will not be responsible for lost documents pertaining to the program. Details of this program, including direct install products and associated Customer fees, are subject to change or cancellation without prior notice.
- 4. Safety and Building Codes:** The auditor will verify that the installed products meet all applicable building and zoning codes, including local, state, and federal laws and regulations, and other relevant requirements.
- 5. Quality Assurance:** Potomac Edison reserves the right to verify the Home Performance audit services and products installed. Customer agrees to permit a representative to have reasonable contact with customer to verify the products that were installed.
- 6. Tax Liability:** Potomac Edison will not be responsible for any tax liability that may be imposed on the Customer as a result of the program delivery and direct installation of products. Please contact your tax advisor for more information.
- 7. Property Rights:** Customer certifies that they have the right to permit installation of the energy-saving products detailed in the Energy-Savings Products Installed table, at the property identified above.
- 8. Renter's Certification:** As a renter, Customer hereby certifies that he/she has received consent from the landlord or homeowner for the receipt of the Home Performance audit and associated direct installation of products.
- 9. Endorsement:** Potomac Edison does not endorse any particular manufacturer, product, system design or contractor as part of this program.
- 10. Information Release:** Customer agrees that Potomac Edison may include Customer's name, products installed, energy usage, and services provided and share energy-savings reports and/or documentation submitted to the Maryland Public Service Commission or its agents or other agents or consultants working on behalf of Potomac Edison. Potomac Edison will treat all other information gathered in evaluations as confidential and report it only in the aggregate.
- 11. Limitation of Liability:** Potomac Edison assumes no responsibility for the performance of the equipment or equipment warranty, the quality of the work, labor and/or materials supplied, and/or the acts or omissions of the participating contractor and/or auditor. The customer agrees to indemnify, defend and hold harmless Potomac Edison from any and all liability associated with this project. Potomac Edison is not liable for any direct, consequential or incidental damages, or for any damages connected in any way with, or resulting from participation in this program. Potomac Edison reserves the right to not deliver program services and products if the form is not filled out completely and accurately.
- 12. Warranties:** Potomac Edison does not warrant the proper completion of work or the performance of any installed product. Potomac Edison makes no warranties or representations of any kind, whether statutory, express, or implied, including, without limitations, warranties of merchantability or fitness for a particular purpose regarding measures outlined in the Energy-Saving Products Installed table. Potomac Edison makes no guarantee of energy-savings results by receiving a Home Performance audit and direct installation of energy-saving products.
- 13. Right to Refuse:** The auditor has the right to refuse service or end the program delivery when confronted by a Customer acting inappropriately or when facing an unsafe situation. Inappropriate behavior includes but is not limited to the following: unreasonable demands for service, personally threatening or offensive language, threatening or erratic behavior, and inappropriate contact.
- 14.** By participating in these energy efficiency and peak demand reduction programs, customers agree to allow their utility to retain ownership of all Capacity Rights which refers to the demand reduction associated with any energy efficiency and peak demand reduction measure for which incentives were provided by the Company. Your utility will aggregate these energy efficiency demand reduction attributes into the PJM capacity market with proceeds being used to offset the program costs.
- 15.** Customer acknowledges that they have been informed that the maximum rebate in the program is \$7500, or 75% of job cost, whichever is smaller. The rebate is determined by the program and is calculated based on the estimated savings from having the participating contractor install energy efficiency improvements. If customer purchases a duct sealing improvement, each such improvement will have a minimum rebate applied of \$750 if other home performance improvements are also purchased and installed. If no other improvements are installed, the minimum duct sealing rebate is \$500.
- 16.** If a purchased and installed customer improvement is for heating or cooling equipment, the rebate is determined by the program and is calculated based on the estimated savings compared to purchasing non-efficient heating and/or cooling units. If the customer has already purchased equipment, they will not be eligible for a rebate for this equipment under the Home Performance with ENERGY STAR® (HPwES) Program if an EmPOWER Maryland rebate was accepted in the form of a discount on the purchase from a participating HVAC contractor. A rebate for heating and cooling equipment will only be paid if other energy efficiency improvements are included in the job. The heating and cooling equipment may be installed by a different participating contractor than the contractor for the other improvements if an energy audit was scheduled with a participating program contractor less than 30 days after the installation date of the heating and cooling equipment.
- 17.** To be eligible for a rebate, all energy efficiency improvements must be installed by, and the initial energy audit must be performed by, a participating Potomac Edison Home Performance with ENERGY STAR contractor in good standing as listed on the program website. The original energy audit and the installation of improvements may be done by two different participating contractors. The energy audit (also known as the test-in), and energy efficient improvements, and a required test out visit after the improvements are installed, must meet all requirements of the Federal Home Performance with ENERGY STAR program.
